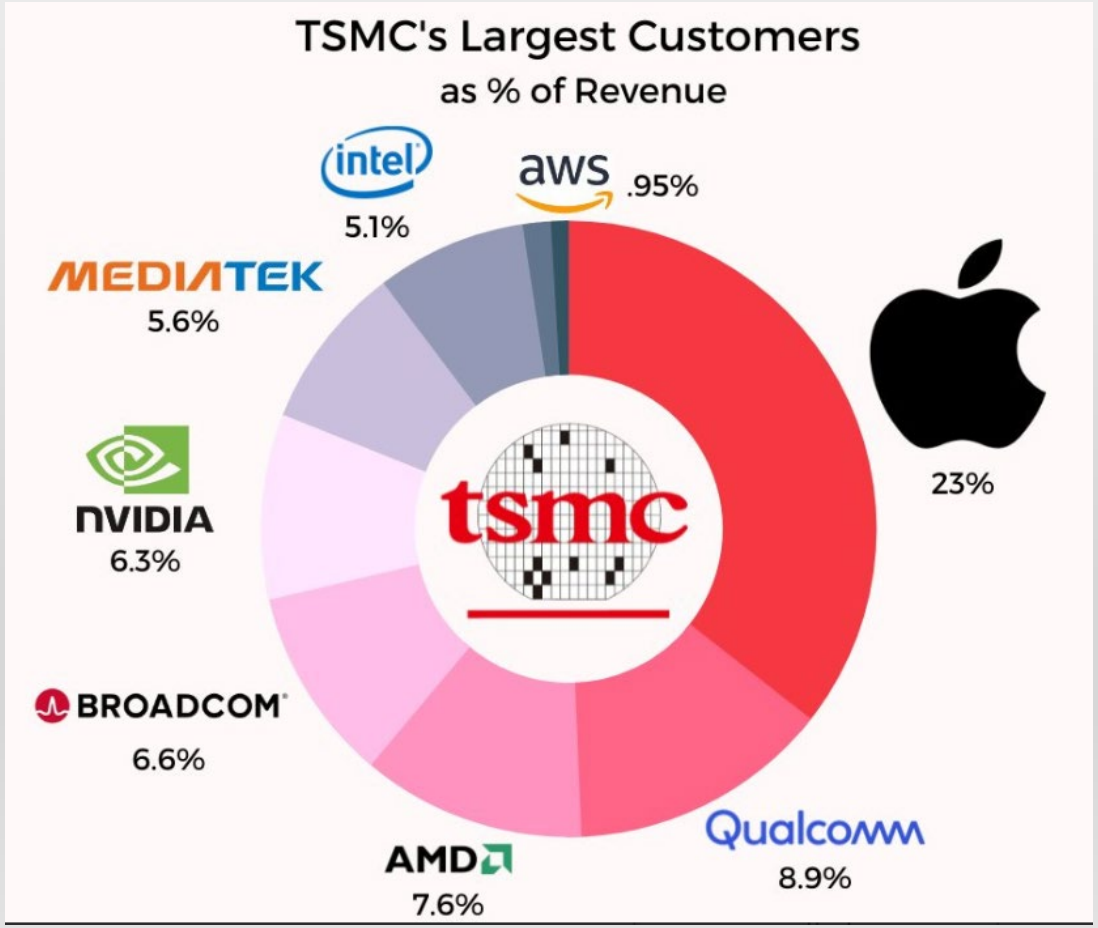
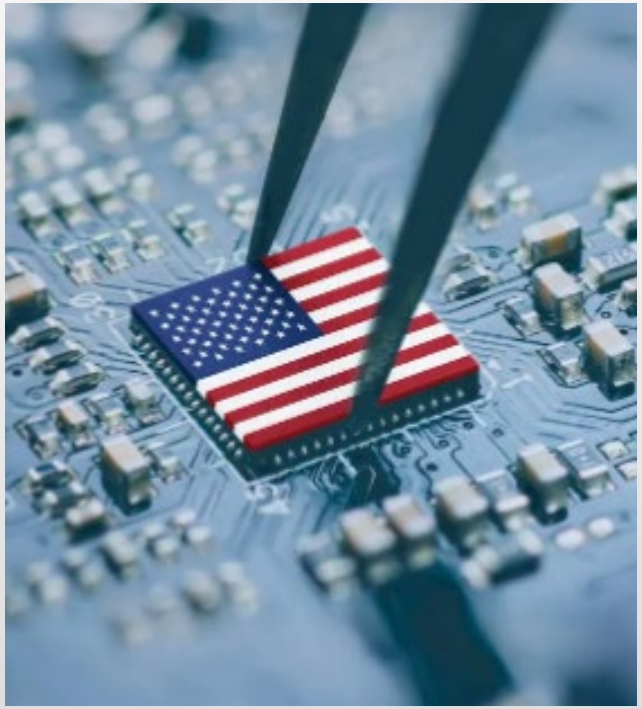
PHOENIX HOUSING MARKET BOOMS AS BUILDERS GEAR UP FOR TSMC JOB INFLUX

tsmc

The types of chips TSMC will be producing are in high demand, and that demand will only increase.

These chips are used for electronics like phones and tablets and in artificial intelligence—just to name a few applications





The U.S. is focused on bringing manufacturing of these chips within our borders.

- The County's tech future depends on these types of chips.
- Manufacturing within the U.S. decreases risks of foreign supply chain issues.
- Major job creator.
